

**Dutch von Ehrenfried  
NASA Flight Controller  
Mercury, Gemini, Apollo, ALSEP, ERTS, Skylab and Space Station Programs**

I'm a past NASA Flight Controller who supported Mercury, Gemini, Apollo, ALSEP, ERTS, Skylab and Space Station. I am thoroughly disgusted with what this administration is doing to the country let alone the Space Program. I worked with Walt Cunningham and strongly support his views.

After the damage is done, will the country be able to undo the harm in time. In just one year, I now understand what Obama meant when he said he was going to fundamentally change America.

Good luck in your efforts.
